

Wheatware™ Bio-Mass 75 Q & A

What is BioMass-75?

BioMass-75 products are strong, rigid, food contact approved and contain wheat (majority) and plastic (minority). Unlike corn PLA products, they are heat resistant to 212°F (100°C) and washable (USDA: requires 180°F temp water for 2 minutes for cleaning cutlery and dishes).

Is Bio-Mass 75 compostable?

No, BioMass-75 products are not compostable.

Can you recycle Bio-Mass 75 products?

No, you can not put BioMass-75 products in recycle bins. They can be sent back to Wheatware.com™ for recycling.

What are the benefits of BioMass-75?

BioMass-75 Chopsticks help to reduce the loss of virgin forests for chopsticks which use annually 25 million trees per yr.

BioMass-75 Flatware help reduce oil-plastic dependency. Both, a first step towards heat resistant, strong, rigid, oil & tree free compostable products.

Are Wheatware™ products safe for those with wheat allergies?

Wheatware™ commissioned a laboratory study which concluded that Wheatware™ products are safe for people who have wheat allergies.

Wheatware.com™: saving forests and earth's valuable resources

The Wheatware™ commitment is to help secure a sustainable future by offering an expanding number of products which replace virgin forest wood products. In addition we make plastic replacement products that reduce our dependency on oil. Wheatware™ and Cornware™ products open up a world of new earth-friendly eco-products for us, our children and generations to come.
