

Wheatware™ Bio-Compostables Q & A

What does *compostable* mean?

Compostable (ASTM D6400-04) means products (right) turn into 100% Earth friendly fertilizer within 90 days of being placed in a commercial composting facility.

Benefits us by:

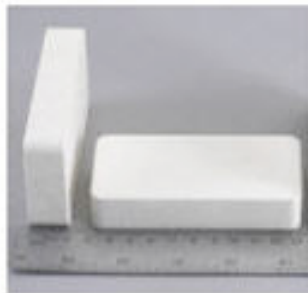

- Bypassing remaining landfills, or
- Bypassing disposal in incinerators, reducing greenhouse emissions.

What does *Bio-Compostable* mean?

Means a product can bypass the commercial composting facility and disintegrate safely in microbially-active soil, becoming friendly compost.

Wheatware™ Bio-Compostable products are certified ASTM D6400-04 compliant and are also Bio-compostable.

Wheatware.com™: saving forests and earth's valuable resources

The Wheatware™ commitment is to help secure a sustainable future by offering an expanding number of products which replace virgin forest wood products. In addition we make plastic replacement products that reduce our dependency on oil. Wheatware™ and Cornware™ products open up a world of new earth-friendly eco-products for us, our children and generations to come.
