

Wheatware™ Flatware

“Eat Green – Live Green”

Flatware is available in both Cornware™ & Wheatware™ BioMass-75.

Cornware™: our **Corn PLA** flatware is biodegradable and earth friendly.

They are strong and a great replacement for plastic flatware.

Note: These are for cold-use only.

Wheatware™ BioMass-75: Share these heat-resistant, heavy duty forks, spoons and knives at your next party. Made from majority wheat, minority plastic, thus reducing America’s demand on foreign oil.

For home, office, cafeteria and restaurant use. The knife is so well designed it can cut through a tomato perfectly, yet is strong enough to cut steak.

Durable, washable and reusable.

Note: These are heat resistant over 212°F

Wheatware.com™: reducing America’s reliance on foreign oil

Our affordably-priced plastic flatware alternatives are manufactured using renewable crop-based resins as the main ingredients. Both are great environmental steps towards a sustainable society.

The Wheatware™ commitment is to help secure a sustainable future by offering an expanding number of products which replace virgin forest wood products. In addition we make plastic replacement products that reduce our dependency on oil. Wheatware™ and Cornware™ products open up a world of new earth-friendly eco-products for us, our children and generations to come.
